Jason Bearthes

Senior Web Developer

Columbus, GA | (404) 991-4618 | bearthes@gmail.com | github.com/jaybeetech14

PROFESSIONAL SUMMARY

Senior Web Developer with 25+ years of experience designing, building, securing, and scaling websites and eCommerce platforms. Deep expert in WordPress and PHP at scale — security hardening, malware remediation, performance optimization, complex migrations, and DNS architecture. Hands-on technical leader who partners with stakeholders to turn business needs into reliable, high-performing web platforms. Builds with AI-augmented development workflows to ship faster without sacrificing quality.

CORE SKILLS

Languages & Platforms: PHP, JavaScript, HTML5, CSS3; WordPress (expert), Shopify, Kentico, Joomla

Infrastructure: LAMP/LEMP stacks, cPanel / Plesk / webOS, DNS management, site migrations (FTP & hosting platforms)

Specialties: Web application security, malware prevention & restoration, speed/performance optimization, eCommerce & WooCommerce solutions, SEO, Section 508 accessibility compliance

Workflow: AI-augmented development (Anthropic API), wireframing & prototyping, technical client consultation, content & social media

PROFESSIONAL EXPERIENCE

Director (Hands-On Senior Web Developer) | trueITpros

2014 – Present

- Senior hands-on developer and technical lead for CMS-driven websites (WordPress, Kentico, Shopify, Joomla), from wireframes and development sites through production launch and ongoing support.
- Own web application security: hardening, malware prevention, and full restoration of compromised sites.
- Performance optimization across the LAMP stack, hosting configuration, and front-end assets.
- Plan and execute complex website migrations (FTP, cPanel, Plesk) with zero-downtime DNS cutovers.
- Build and support eCommerce solutions, including catalog, payment, and third-party integrations.
- Audit sites for Section 508 accessibility compliance and remediate issues.

- Serve as senior technical consultant to clients: requirements gathering, architecture recommendations, backups, and revisions.
- Provide monthly maintenance for 60+ client websites — updates, backups, security monitoring, malware remediation, and revisions.

Owner / Sole Proprietor | JayBee Tech

Jan 2005 – Present

- Independent web development consultancy: WordPress design/development, hosting, migrations, and DNS management for clients.
- eCommerce solutions and WooCommerce support; SEO management; content creation and social media marketing.
- Full client lifecycle: consultations, requirements, revisions, updates, backups, and security.

EARLIER CAREER

Change Control Specialist (promoted from Document Control Technician) | Immucor Gamma

2009 – 2014

- Built and maintained SharePoint sites and databases for document control and quality-systems metrics reviewed by executives.
- Developed local and global change control policies and procedures in a regulated manufacturing environment.

Dailies Project Coordinator (promoted through QA & Validation roles) | CIBA Vision

1999 – 2008

- Wrote, executed, and coordinated simultaneous software and equipment validations; built a validation tracking database to keep projects on schedule.
- Owned SAP communications and training for the Atlanta site; integrated conference-room and video-conferencing technology.
- Led 4–6 person teams; created safety tracking databases supporting VPP status.

EDUCATION & CERTIFICATIONS

- B.S., Computer Science — American Intercontinental University, 2007
- CompTIA A+ Certification
- Project Management Certification
- Gwinnett Technical College, 2012

MILITARY SERVICE

- U.S. Army — 31U Signal Support Systems Specialist, 1996–1997
- Telecommunications systems; led 10–20 person teams through training exercises
- Honorable discharge
